

# **METALINE CONTACT MINES**

## **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FOR THE QUARTER ENDED JUNE 30, 2011**

### **GENERAL**

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide information to assist you in better understanding and evaluating the Company's financial condition and results of operations. The Company recommends that you read this MD&A in conjunction with its Financial Statements for the quarter ended June 30, 2011.

### **OVERVIEW**

Metaline Contact Mines (hereinafter "Metaline", "Company", "we", "us", or "our") is engaged in the business of acquiring, owning and managing precious and base metals royalties. Royalties are passive (non-operating) interests in mining projects that provide the right to receive revenue from such projects, after deducting specified costs, if any. Substantially all of our revenues are and will be derived from royalty interests. We do not conduct mining operations at this time. During the quarter ended June 30, 2011, we focused primarily on managing our royalty interests.

### **RESULTS OF OPERATIONS**

For the quarter ended June 30, 2011, our gross royalty revenues from operations were \$5,335, the same as in 2010, from our two mining projects, the Golden Chest Mine and the Pend Oreille/Metaline Zinc Mines, broken down as follows:

#### **Golden Chest Mine**

We received no royalties from operations at the Golden Chest Mine during the quarter ended June 30, 2011, the same as in 2010. The termination of royalties was due to our selling our interest in the mine on December 15, 2010 to Golden Chest LLC, a joint-venture between New Jersey Mining Company and Marathon Gold USA Corporation, the United States subsidiary of Canadian-based Marathon Gold Corporation. Under the terms of the sale agreement, the company will receive a total of \$1,240,000, in the following installments: \$40,000 on December 15, 2010; \$75,000 on December 15, 2011; \$100,000 on December 15, 2012; \$125,000 on December 15, 2013; \$150,000 on December 15, 2014; \$200,000 on December 15, 2015; \$350,000 on December 15, 2016; and \$200,000 on December 15, 2017. The Company will co-hold (along with the property owner) a first mortgage as collateral.

#### **Pend Oreille/Metaline Zinc Mines**

We received \$5,335 in advanced royalties from Teck American Incorporated ("Teck American") for the quarter ended June 30, 2011, the same as in 2010.

There were no costs of royalties during the quarter ended June 30, 2011, or for the same period in 2010.

#### **Operating Gain**

We had an overall operating gain of \$3,943 in the quarter ended June 30, 2011, compared to an operating gain of \$3,556 in 2010.

During the quarter ended June 30, 2011, our general and administrative expenses decreased by \$387, to \$1,392 from \$1,779 in 2010. This decrease was predominately due a decrease in administrative expenses of \$685.

#### Other Income

During the quarter ended June 30, 2011, we earned \$1,753 in other income, compared to \$1,752 in 2010. The increase of \$1 was due to a slight increase in dividends paid on our money market funds.

#### Gain Before Taxes

We had a net gain, before taxes, of \$5,696 for the quarter ended June 30, 2011, compared to a net gain of \$5,308 in 2010, for the reasons discussed above.

### **LIQUIDITY AND CAPITAL RESOURCES**

We have traditionally funded our capital requirements from royalty revenues from operations, dividends earned on our cash accounts, and other income. As of June 30, 2011, our cash and cash equivalent position was \$118,596, compared to \$74,278 on June 30, 2010. We have no debt, and do not expect to incur any debt in the near future. General and administration expenses continue to be our most significant capital requirements.

Provided we are able to maintain our current level of revenues, we expect to be able to satisfy our anticipated cash expenditure requirements for the foreseeable future without the need of additional capital. If, however, our revenues should decrease considerably, or our expenses increase dramatically, depending on the circumstances thereof, we could require additional capital within 12 - 18 months. Our sources of additional capital include:

- (a) Collection of Receivables. We have a related party receivable from Nor-Pac Limited Company ("Nor-Pac") of \$100,000, with accrued interest of \$77,125, as of June 30, 2011. Nor-Pac owns approximately 81% of our outstanding shares, and has related management. Accordingly, we believe we have the ability to collect portions of this receivable in the event of a shortfall of cash.
- (b) Increase Royalty Revenues. As a royalty-based company, increasing our royalty revenues from our current mining projects is under the control of our lessee, Teck American. Factors that could influence our royalty revenues include: changes in precious and base metals prices; unanticipated grade, geological, metallurgical, processing or other problems; changes in project parameters as plans of the operators are refined; and other economic and market conditions.

Teck American has suspended commercial production at their nearby Pend Oreille Mine, and placed it on "care and maintenance" until the markets improve. Teck American continues to maintain our lease in good standing, including the payment of advanced royalties. However, any increase in revenues from our Pend Oreille/Metaline Zinc Mines project is not a viable option at this time.

As mentioned above, we sold our interests in the Golden Chest Mine and will be receiving no future royalty payments from New Jersey. However, we will be receiving installment payments from the sale thereof as mentioned above.

- (c) Sale of Company's Common Stock. In today's economic climate, there are no assurances that we would be able to sell shares of our authorized, but unissued, common stock on acceptable terms. Such stock offerings are costly, can be legally restrictive, and dilutive to our shareholders.

- (d) Sale of Certain Assets. We own 32,500 shares of free-trading common stock in New Jersey Mining Company with a recorded value of \$14,089. The current market value of these shares is approximately \$7,800.

On December 15, 2010, we sold our leasehold interest in the Golden Chest Mine to Golden Chest LLC, a joint venture company owned by New Jersey Mining Company and the U.S. subsidiary of Canadian-based Marathon Gold Corporation. Under the terms of the sale, we will receive a total of \$1,240,000, in installment payments through 2017. We received our first installment payment of \$40,000 on December 15, 2010.

#### **LITIGATION**

In December of 2009, the Company was named as a co-defendant in a lawsuit initiated by Stimson Lumber Company ("Stimson"). Stimson is the owner of certain real property, located in Pend Oreille County, Washington, a portion of which is a site that contains hazardous materials as defined by the U.S. Environmental Protection Agency. In its suit, Stimson alleges the Company, at one time, either owned and/or operated the site, and is demanding the Company to pay its proportionate share of clean-up costs. The Company contends that it has neither owned, nor operated, the site, and, in fact, has never had anything whatsoever to do with the site, and has retained legal counsel to respond to the Stimson allegations.

On March 25, 2011, the lawsuit by Stimson Lumber Company against us described above was dismissed.
